

# Growing Green

Custom made, one of a kind rain-barrel, beautifully planted self-watering planter, and accessories (Worth over \$250)

Did you know that the San Joaquin Valley has sunk over 21 feet since the 1920s due to the fact that we are taking water from the California Aquifer more quickly than nature can replace it! The Valley Oaks Rechargers present to you a chance to do your part. Rather than use clean potable water to do dirty jobs, why not catch water from your roof and use the grey water instead? If you win this basket doing that will be just a matter of attaching this student designed and built rain barrel to your downspout using the included hardware. To top it off the students designed a water-saving self-watering planter which serves as a cover for the barrel. To learn more about this go to <https://www.youtube.com/watch?v=BSfQAM2T60M>.

To meet the students who made this please go to [https://docs.google.com/presentation/d/1UCLJUFxlcc4-koN1H7BQPoTVPYDGcJFbihWDUJpaHms/edit#slide=id.gc6f73a04f\\_0\\_0](https://docs.google.com/presentation/d/1UCLJUFxlcc4-koN1H7BQPoTVPYDGcJFbihWDUJpaHms/edit#slide=id.gc6f73a04f_0_0)
