

## Valley Oaks Charter School Accelerated Student Work Load

Students should be assigned work based on the following criteria:

- Aligned with the courses routinely assigned at the district of residence;
- Needed for grade advancement/graduation;
- Designed to promote success in the world of work.

In addition, all coursework should be incremental in nature ensuring that the student is continually challenged and is experiencing skill improvement in academic areas.

Students are enrolled in on average 27.5 semester units, as a guideline to obtain the minimum number of semester units to graduate, within a four year time period.

Students who request to enroll in coursework over 31 semester units per semester must submit a memo, semester grades, and a current transcript to the site administrator for approval, prior to the start of the semester.
